DISCOVER THE UNEXPECTED

The Honda BR-V features the advanced collision-free system to date: the Honda SENSING. With a state-of-the-art wide-angle camera and a high speed image processing chip, the field of vision is wider, so the system detects the situation in front much faster.

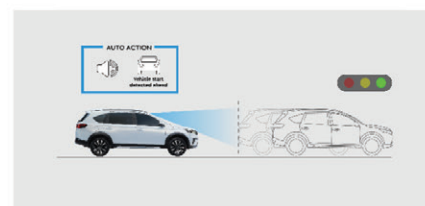

CMBS

Collision Mitigation Braking System or CMBS helps to warn, mitigate collision, or lessen the severity of the frontal collision.

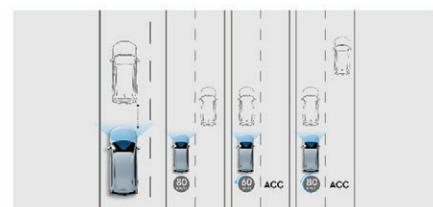

RDM

Road Departure Mitigation or RDM helps you avoid collision by providing audible and visual warning whenever the car swerves to the other lane without the proper use of signal lights, while the LDW or Lane Departure warning notifies you when going off course.

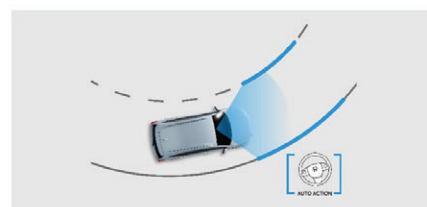

LCDN

Lead Car Departure Notification System or LCDN keeps you informed by alerting when the car in front you has moved ahead from a standstill. Other lane without the proper use of signal lights, while the LDW or Lane Departure warning notifies you when going off course.

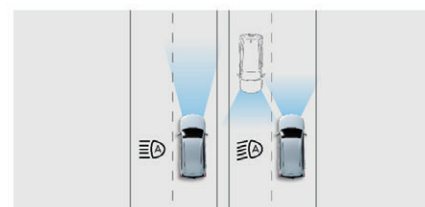

ACC

The Adaptive Cruise Control (ACC) is perfect for long drives as it lessens your fatigue by maintaining the distance based on the car in front of you, braking and accelerating as needed.

LKAS

Lane Keep Assist System or LKAS keeps the vehicle at the center of the visible road lanes and in the best driving position as it guides you to follow the flow of the road.

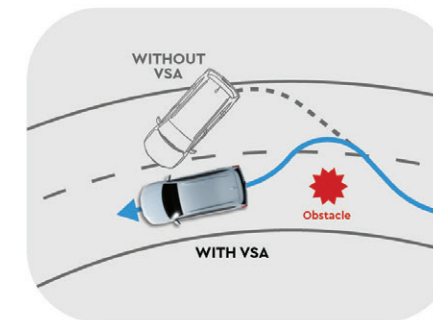

AHB

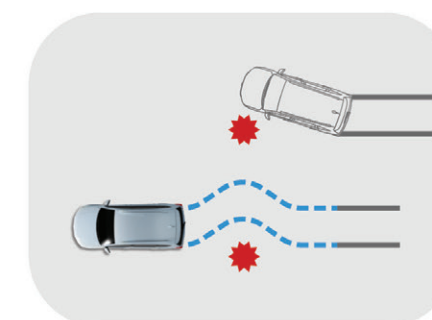

Auto High-Beam or AHB allows you to automatically turn on the high beams when there are no other vehicles ahead and lower your beam appropriately when encountering oncoming traffic.
